ANKIT SHARMA

Data Analyst | Excel | SQL | Python | Power BI
ankitsharma74an@gmail.com | Noida, Uttar Pradesh | +91 9109060416 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

MBA (Business Analytics & Operations) graduate and Data Analyst intern with 2 months' experience in MSME credit-risk analysis, validating KYC, GST, and bureau data. Skilled in SQL, Python, Power BI, Excel (Power Query, DAX) and Git/GitHub. Analysed 3.21M Instacart orders (58.97% reorder rate) and uncovered that 21.6% of customers drive 68% of revenue across 8.05 lakh cleaned records. Delivered 4 dashboards and held 15+ certifications. Scaling toward cloud data warehousing for enterprise-level data architectures. Open to full-time roles (remote/on-site).

EDUCATION

- **MBA -** Business Analytics & Operations, Galgotias University, Greater Noida (U.P.) 2024 - 2025
- **BCom -** Specialisation in Computer Applications, PIMG, Gwalior (M.P.) 2019 - 2022

EXPERIENCE

Data Analyst Intern | Vikas Bharat Advisory Private Limited 08/2026 – 09/2026

- Analysed MSME and business-loan application data to evaluate eligibility, repayment capacity and credit risk; validated KYC, Udyam, GST returns, bank statements and credit bureau reports to identify data inconsistencies and risk indicators.
- Converted findings into structured credit assessment notes and actionable query lists; identified recurring documentation gaps, repayment delays and decline patterns to support data-driven lending decisions and efficient loan processing.

TECHNICAL SKILLS

- **Programming & Libraries:** Python, Pandas, NumPy, SciPy, Matplotlib.
- **Databases & SQL:** PostgreSQL, Querying, JOINs, Subqueries, GROUP BY, Filtering, Stored Procedures, Triggers.
- **Business Intelligence:** Power BI, Interactive Dashboard Visualisation, Data storytelling.
- **Microsoft Excel:** Power Query, Power Pivot, DAX, Advanced Formulas, ETL, Data Cleaning, Data Validation.
- **Automation & Productive Tools:** VBA, Macros, XLBooster, AI-driven Analytics, Git, GitHub.

PROJECTS

- **Instacart Online Grocery Basket Analysis | SQL, Python & Power BI**
- Analysed 3.21M orders, 32.43M items, and 206K customers using SQL and Python to evaluate reorder behaviour, purchasing trends, product performance, customer segments, and product associations.
- Performed data cleaning, relational integrity checks, SQL aggregations, Python EDA, and market-basket analysis; reconciled SQL and Python results through 27 Python validation checks and 23 cross-validation checks, with zero failures.
- Built Power BI data models, DAX measures, and interactive dashboards; identified a 58.97% reorder rate, a 49,610-customer high-frequency/high-reorder segment, and product-pair associations to inform cross-selling, bundling, and assortment planning.
- **Customer Analytics Dashboard | Microsoft Excel**
- Transformed 10,67,371 E-commerce transactions into 8,05,549 cleaned records using Power Query for ETL, Power Pivot and DAX for data modelling and XLOOKUP, IFS and PERCENTILE for RFM segmentation and churn scoring.
- Identified that 21.6% of customers (Champions) generated 68% of revenue, while 50.9% of churned customers contributed 19.6% of revenue; delivered an interactive dashboard with slicers, cohort retention analysis, and KPI cards.

CERTIFICATIONS & TRAINING

- SQL Masterclass Beginner to Advanced (ISO 9001:2015).
- Microsoft Excel Beginner to Advanced (ISO 9001:2015).
- The Pandas certification on Kaggle Learn.
- 30 Days Python Micro Courses (ISO 9001:2015).
- 30 Days Power BI Micro Course (ISO 9001:2015).
